PROFESSIONAL SUMMARY

Software Test Engineer with **4.3+ years of experience** in **Manual and Automation Testing**, specializing in **web, API, and regression testing** for enterprise applications. Hands-on experience in building and maintaining **Selenium-based automation frameworks**, and executing **Playwright automation with Typescript** in real-time project scenarios.
Strong contributor in Agile teams with a quality-driven mindset.

TECHNICAL SKILLS

- **Programming:** Java, TypeScript
- **UI Automation:** Playwright, Selenium WebDriver
- **API Testing & Automation:** Rest Assured, Postman, Playwright API
- **Test Frameworks:** TestNG, Cucumber, Playwright Test
- **Automation Practices:** Page Object Model (POM), Data-Driven Testing, Fixtures, Reusable Utilities
- **Playwright:** Playwright CLI, Playwright MCP, Cross-Browser Testing, Parallel Execution, Trace Viewer
- **CI/CD & Version Control:** Jenkins, Git, GitHub
- **Build & Dependency Management:** Maven, npm
- **Defect & Test Management:** JIRA
- **Methodology:** Agile / Scrum

PROFESSIONAL EXPERIENCE

EOX Vantage — Software Quality Control Engineer

August 2023 – June 2026

- Worked on a **US Insurance domain project**, ensuring quality and compliance across multiple environments and business workflows.
- Created **test strategies, test plans, requirement-based test cases, and regression suites** aligned with business and regulatory requirements.
- Designed and maintained **Selenium-based automation frameworks** to automate critical regression scenarios and improve test coverage.
- **1 year of hands-on experience with Playwright and TypeScript**, developing scalable UI automation using POM, fixtures, reusable utilities, and robust locator strategies.
- Automated **functional, regression, negative, end-to-end, and cross-browser scenarios** using Playwright with parallel execution, API validation, tracing, screenshots, and reporting.
- Leveraged **Playwright CLI and MCP with AI-assisted automation** for browser exploration, locator identification, test generation, debugging, and accelerated test development.
- Integrated automation with **Jenkins CI/CD and Git**, improving test execution efficiency, stability, maintainability, and reducing manual regression effort.

QualityKiosk Technologies — Software Test Engineer

June 2022 – August 2023

- Worked on a **Corporate Internet Banking** application, covering functional and regression testing of critical banking workflows.
- Actively participated in **Agile sprint testing**, requirement analysis, test execution, and backlog management.
- Created and maintained comprehensive **functional test cases** based on business and technical requirements.
- Conducted **API testing using Postman**, validating request/response payloads, status codes, and business rules.
- Conducted **defect triaging and root-cause discussions** with development and project management teams.
- Prepared and demonstrated **release demos to business stakeholders**, ensuring features met acceptance criteria before production release.

EDUCATION

Bachelor of Engineering (B.E.)

Visvesvaraya Technological University — **2021**

CGPA: 8.2/10
